

SMCI

Super Micro Computer, Inc.

NASDAQ · GYIS / Investment Club

RECOMMENDATION	CONVICTION	12-MO PT	CURRENT	IMPLIED	HORIZON
HOLD	SPLIT*	\$46	\$30.50	+51%	12 mo

*HIGH conviction Thesis 2 · MED-HIGH Thesis 1 · LOW Thesis 3. Rating held at HOLD — economics BUY-like (+51%) but unresolved governance streams cap conviction. Faithful to the committed thesis document; not the template's hard-coded BUY.

REINFORCED

THESIS 1

AI GROWTH & DIVERSIFICATION

TOP-CUSTOMER CONCENTRATION

63% → 27%

- Q2 → Q3 FY26 · 10-Q smci-20260331
- Enterprise channel 15% → 28% (+46% YoY)
 - FY26 guide reaffirmed \$38.9–40.4B
 - AI-GPU platforms >80%; record backlog

STRONG

ALREADY INFLECTED

THESIS 2

MARGIN RECOVERY

NON-GAAP GROSS MARGIN, Q3 FY26

10.1%

- vs 8% bullish threshold · +370bp QoQ
- GAAP GM 9.9% vs 6.3% Q2 FY26
 - DCBBS GM >20%, >25% of profit
 - Q2 trough = one-time expedite (CFO)

STRONG

REFRAMED

THESIS 3

GOVERNANCE DISCOUNT

DOJ ACTED — INDICTED INDIVIDUALS, NOT THE COMPANY

3 indicted · ~\$2.5B alleged China diversion

- SMCI not charged (partial bull)
- Co-founder Liaw indicted & resigned (partial bear)
- Closure multi-stage, not binary

REFRAMED

AI Capital-Flow Chain

Capex: hyperscaler FY26 guides (MSFT \$80B+, GOOGL \$75B+, AMZN \$100B+, META \$65B+ — combined ~\$320B+ guided minimums; broader CY2026 aggregate estimates run higher). Framework: Three-Stack methodology.

Layer Classification — Defended

Layer verdict	APPLICATION / SYSTEMS INTEGRATOR
Moat type	PROCESS/OPERATIONAL + emerging DLC scale
Time-to-market	6–12 wk vs Dell/HPE 6–12 mo
Cycle stage	MID (not early / not late saturation)
Surviving analog	Cisco 1995–97 (mid-cycle)

FAILED LOOKALIKES — ADDRESSED

LOOKALIKE	SURFACE MATCH	WHY SMCI DIFFERS (SOURCED)
Nortel 1999–02	HW integrator, customer concentration, capex ride	Concentration 63% → 27%; enterprise 15% → 28%; investment-grade hyperscalers vs leveraged CLECs (10-Q smci-20260331)
Wang Labs	Process edge commoditized by horizontal platform	DCBBS >20% GM + \$46M software bookings → process edge becoming structural attach (Q3 FY26 call)
Boeing 737-MAX	Strong franchise, multi-stream investigations, multi-year discount	Same <i>structure</i> (DOJ+SEC+civil+board); discount compresses stream-by-stream — informs Thesis 3 path

VERDICT Pattern **HOLDS** (Cisco mid-cycle). Reinforce *within* the application-layer band — not a facilitation re-rate. VRT (facilitation) ~57x fwd P/E vs SMCI ~10x: market already prices the layer gap.

LAYER: OPERATING / DEMAND · MODULE 1 of 3

FY26 revenue to **\$38.9–40.4B** is structurally supported by hyperscaler + enterprise AI capex, AND customer-concentration risk has materially diminished — the Q3 FY26 drop from 63% → 27% single-customer concentration directly weakens the Nortel failed-lookalike.

STRONG

STRENGTH KEY — STRONG: primary-source numeric, filed/audited, unambiguous · MODERATE: primary qualitative or secondary numeric, some interpretation · WEAK: directional only.

Evidence Chain

EVIDENCE QUALITY MATRIX

#	EVIDENCE	SOURCE	STRENGTH
1	FY26 net-sales guide \$38.9–40.4B reaffirmed	SMCI 8-K Ex 99.1, filed 2026-05-05	STRONG
2	Top-customer concentration Q3 FY26 27% (from ~63% Q2)	Q3 FY26 call (Motley Fool / AOL), 2026-05-05	STRONG
3	Enterprise channel \$2.8B = 28% of Q3 (15% Q2); +46% YoY, +45% QoQ	Q3 FY26 earnings call, 2026-05-05	STRONG
4	OEM/large-DC segment \$7.4B (72%), +183% YoY	Q3 FY26 earnings call, 2026-05-05	STRONG
5	AR concentration Customer A 32.2% — diversification may be partly billing/timing	SMCI 10-Q smci-20260331, filed 2026-05-05	MODERATE

STEELMANNED COUNTERARGUMENT Q3 FY26 revenue missed consensus ~18% (\$10.24B vs ~\$12.45B). The "diversification" is an artifact: Q2's 63% customer was a pull-forward; Q3's 27% is the same customer at a lower seasonal rate. The 10-Q shows Customer A still 32.2% of AR — Q3's "diversified" mix is a receivables-timing artifact, not structural. The reaffirmed FY26 guide is back-loaded into an \$11.0–12.5B Q4 — the same back-end pattern that preceded the Q2 miss. **Goldman maintains Sell, \$30 PT, citing concentration risk.**

Source: Goldman Sachs (K. Murphy) Sell reiteration 2026-05-12, \$30 PT, revenue-miss data — Motley Fool transcript 2026-05-05.

Response Tree

RESIDUAL RISK ACKNOWLEDGMENT One branch is conceded: AR concentration (Customer A 32.2%) exceeds revenue concentration (27%), so Q3's revenue diversification could partially reverse on collections. Structural-vs-cyclical is genuinely open until Q4. **What closes it:** Q4 FY26 (Aug 11, 2026) with top-customer concentration sustained ≤35% and enterprise channel ≥25% of revenue. One quarter resolves it; until then hold with this as the single most testable assumption.

Falsification Criteria

TRIGGER	OBSERVABLE	TIMELINE	IMPLICATION
Top-customer concentration rebounds >50%	Q4 FY26 call disclosure	Aug 11 '26	Thesis 1 fails; Nortel analog strengthens; exit
FY26 revenue < \$38.9B (guide low)	Q4 FY26 earnings	Aug 11 '26	Demand leg failed; thesis fails regardless of margin
Hyperscaler FY27 capex cut >10%	MSFT/GOOGL/AMZN/META Q2 CY26 earnings	Late Jul–Aug '26	Macro driver weakened; revisit FY27 model
Enterprise channel <20% of revenue	Q4 FY26 earnings	Aug 11 '26	Diversification was cyclical, not structural

Confirmation Criteria

SIGNAL	OBSERVABLE	TIMELINE	IMPLICATION
Top-customer concentration sustained ≤35%	Q4 FY26 call	Aug 11 '26	Structural diversification confirmed; Nortel analog substantially weakened
Q4 revenue ≥ guide midpoint \$11.75B	Q4 FY26 earnings	Aug 11 '26	Execution discipline confirmed
Enterprise channel ≥30% of revenue	Q4 FY26 call	Aug 11 '26	Mix shift accelerating — supports Margin thesis too
Backlog at new record high	Q4 FY26 earnings	Aug 11 '26	Order book intact through FY27

Monitoring Scaffold — Thesis 1

WEEKLY - NVIDIA data-center / shipment commentary changes - Hyperscaler 8-K filings for capex updates	QUARTERLY 10-Q concentration disclosure (revenue AND AR) - Enterprise channel growth; deferred-revenue trend
MONTHLY - Sell-side rating changes (watch if peers adopt Goldman's concentration framing) - Peer divergence vs DELL, HPE (read-across)	EVENT-DRIVEN 8-K material customer wins/losses - Hyperscaler PPAs naming a SMCi competitor; NVIDIA Blackwell/Rubin allocation updates

LAYER: MARGIN / OPERATING LEVERAGE · MODULE 2 of 3

Q2 FY26 compression was transitory (one-time expedite, customer mix); the Q3 FY26 recovery to **10.1% non-GAAP GM** exceeds the original 8% bullish-inflection threshold, and the DCBBS mix shift makes the recovery durable, not cyclical.

STRONG

Evidence Chain

EVIDENCE QUALITY MATRIX

#	EVIDENCE	SOURCE	STRENGTH
1	Q3 FY26 non-GAAP GM 10.1% (vs 6.4% Q2); GAAP 9.9%	SMCI 8-K Ex 99.1, 2026-05-05	STRONG
2	Q2 compression = one-time expedite, "large December deployment"	Q3 FY26 call, CFO Weigand, 2026-05-05	STRONG
3	DCBBS GM >20%; expected >25% of profit	Q3 FY26 call, CEO Liang, 2026-05-05	MODERATE (mgmt commentary, not separately filed)
4	Q4 FY26 GAAP GM guide 8.2–8.4%; non-GAAP EPS \$0.65–0.79	SMCI 8-K Ex 99.1, 2026-05-05	STRONG
5	Software bookings >\$46M in Q3 FY26	Q3 FY26 call commentary, 2026-05-05	MODERATE (transcript only)

STEELMANNED COUNTERARGUMENT A single quarter proves nothing structurally. Q3's 10.1% NG GM is below the FY23 18% peak and barely above FY24's 14% — the multi-year arc is *down*. The DCBBS mix story is unverifiable: SMCI does not separately disclose DCBBS revenue or margin. Dell/HPE liquid-cooling investment will compress SMCI's DLC premium over 12–24 months. The Q4 GAAP guide 8.2–8.4% is ~170bp *below* Q3's 9.9% GAAP — management is guiding margin to roll over again. Application-layer integrators equilibrate sub-10% GM; SMCI is converging to that, not breaking out.

Sources: SMCI 8-K guide range; historical margin trajectory — Chen/Liu Feb 18 2026; DCBBS non-disclosure noted in filings.

Response Tree

RESIDUAL RISK ACKNOWLEDGMENT Two branches partially hold. **(1)** The multi-year trend IS down; the bull case requires accepting ~10% application-layer equilibrium, not facilitation multiples — anyone modeling SMCI as facilitation will be disappointed. **(2)** DCBBS-specific margin is not filed, so “>20%” rests on management credibility — which, post-2024 EY resignation and 2026 indictment, deserves discount. **What closes them:** SMCI separately disclosing DCBBS revenue/margin in a future 10-K, or an analyst bottom-up triangulation. Until then: transitory cost-reversal = STRONG, structural-mix = MODERATE.

Falsification Criteria

TRIGGER	OBSERVABLE	TIMELINE	IMPLICATION
Q4 FY26 non-GAAP GM < 9.0%	Q4 FY26 earnings	Aug 11 '26	Recovery was single-quarter; thesis fails
Q4 FY26 GAAP GM < 8.0% (below guide low)	Q4 FY26 earnings	Aug 11 '26	Mgmt credibility damaged + thesis fails
Deferred revenue declines QoQ in Q4	Q4 FY26 10-K	Aug '26	DCBBS attach story breaks
Dell/HPE DLC product matches 6–12wk time-to-market	Press release	Any time	Process moat compresses; margin pressure resumes
FY27 GM guide (if given) < FY26 actual	FY26 10-K + Q1 FY27	Aug–Nov '26	Industry equilibrium hits sooner than thesis expects

Confirmation Criteria

SIGNAL	OBSERVABLE	TIMELINE	IMPLICATION
Q4 FY26 non-GAAP GM ≥ 10%	Q4 FY26 earnings	Aug 11 '26	Recovery sustained two quarters — durable
Deferred revenue grows >25% QoQ	Q4 FY26 10-K	Aug '26	DCBBS attach accelerating
SMCI separately discloses DCBBS metrics	FY26 10-K	Aug '26	Mgmt credibility on structural mix confirmed
Software bookings >\$50M in Q4	Q4 FY26 call	Aug 11 '26	Services attach growing materially
Operating margin expands with GM	Q4 FY26 earnings	Aug 11 '26	Operating leverage real, not COGS noise

Monitoring Scaffold — Thesis 2

WEEKLY - Component spot prices (HBM3e, DRAM, GPU) — input-cost trend - Competitor DLC launches	QUARTERLY - Deferred-revenue line (forward attach indicator) - Software-bookings commentary; DCBBS commentary depth
MONTHLY - Liquid-cooling adoption research (Dell'Oro, Synergy, IDC) - Peer GM trends	EVENT-DRIVEN - Any Dell/HPE/ODM DLC product announcement - Major hyperscaler cooling-architecture procurement decisions

LAYER: GOVERNANCE / MULTI-STREAM RISK · MODULE 3 of 3

DOJ acted Mar 19, 2026 — indicting three individuals over a ~\$2.5B alleged China-diversion scheme — but did NOT charge SMCI. Worst-tail (corporate indictment) avoided. Discount may be overdone, but closure is now **multi-stage and conditional**, not binary: closes 50–100% over 18–24 mo via sequential resolution of (1) class-action MTD, (2) board investigation, (3) SEC — Boeing-737-MAX-style staged recovery.

REFRAMED

Evidence Chain

EVIDENCE QUALITY MATRIX

#	EVIDENCE	SOURCE	STRENGTH
1	Mar 19 2026 indictment of 3 individuals; SMCI not charged/named	DOJ release; NatLawReview May 2026	STRONG
2	Liaw (co-founder, resigned), Chang (GM TW, terminated, fugitive), Sun (contractor)	Investing.com 2026-04-07; DOJ indictment	STRONG
3	Apr 7 2026 2nd investigation: Angel+Liu+Munger Tolles+AlixPartners+BDO	SMCI PR 2026-04-07; Investing.com	STRONG
4	Bhuvu 26-cv-02606; class period Apr 30 '24–Mar 19 '26; deadline May 26 '26; defs SMCI+Liang+Weigand	Robbins Geller case page; Hagens Berman PR 2026-05-12	STRONG
5	Boeing post-737-MAX: discount closed via staged stream resolution	Boeing 10-Ks 2019–24; market data	MODERATE (analog reasoning)
6	SMCI 0.68x EV/Sales, 15.8x EV/EBITDA, 13.5x P/E vs peer 1.45/20.9/34.0	Chen/Liu Feb 18 2026; refreshed Investing.com 2026-05-18	STRONG

STEELMANNED COUNTERARGUMENT The Feb 18 thesis was the WRONG thesis, and the reframe is reverse-engineered to fit reality. Real risks remain: (a) the 2nd investigation could find material control weaknesses → SEC enforcement or a superseding corporate indictment; (b) BDO could issue a qualified/adverse FY26 opinion (FY24 ICFR opinion was already adverse); (c) the class action survives MTD → \$100s of M settlement; (d) Liaw's trial reveals broader executive awareness; (e) SEC produces separate enforcement. Multi-stream risk is **multiplicative**, not additive — P(all clean) is the product. Goldman maintains Sell, \$30 PT. Discount may **WIDEN** before it closes.

Sources: BDO adverse ICFR FY24 — Chen/Liu Feb 18 2026; SEC investigation — NatLawReview May 2026; Goldman Sell 2026-05-12.

Response Tree

RESIDUAL RISK ACKNOWLEDGMENT Two branches partially hold. **(1)** The 2nd investigation, though narrower, could surface weaknesses the 2024 review missed (China re-exports ≠ Russia shipments) — adverse-finding probability perhaps 25–40%. **(2)** A class settlement of \$100–500M is plausible — 1–3% of projected FY26 revenue. **What closes them:** (i) the board investigation concluding in 2026 matching the 2024 "no fraud" outcome (documentation gaps only); (ii) the MTD granted on the disclosure-failure claims. Both observable within 12 months. This thesis carries **lower conviction than Theses 1 & 2** — size accordingly. Framing: "multiple optionalities on staged closure," NOT "clean catalyst close."

Falsification Criteria

TRIGGER	OBSERVABLE	TIMELINE	IMPLICATION
DOJ superseding indictment names SMCI as corporate defendant	DOJ release	Any time	Thesis fully fails; exit immediately
SEC enforcement vs SMCI or current officers	SEC release	Any time	Discount widens; exit or trim heavily
BDO qualified/adverse opinion on FY26 10-K	FY26 10-K	Aug '26	Mgmt credibility collapses; thesis fails
Class-action MTD DENIED, significant claims survive	Court docket	Q4 '26-Q1 '27	Settlement leverage to plaintiffs; downside expands
Board probe finds material weakness / exec misconduct	SMCI 8-K	Unknown	2024 "no fraud" invalidated; major reset
Liaw testimony implicates Liang/Weigand	Court reporting	2026–27	Discount becomes corporate-level; thesis fails

Confirmation Criteria

SIGNAL	OBSERVABLE	TIMELINE	IMPLICATION
Class-action MTD granted in part/full	Court docket	Q4 '26-Q1 '27	First stream resolves; ~15–25% discount close
Board probe concludes — no findings beyond export-control gaps	SMCI 8-K	Q4 '26–'27	Second stream resolves; another ~15–25% close
FY26 10-K filed clean by BDO	SEC filing	Aug '26	Audit-credibility stream resolves
SEC investigation closes without enforcement	SEC notice / 10-K	Unknown	Final stream resolves; full discount eligible to close
Insider buying by Liang/officers post-May 26	Form 4	Any time	Insider conviction signal on closure path

Monitoring Scaffold — Thesis 3

WEEKLY

- Bhuva docket (PACER); SMCI 8-Ks; insider Form 4s

MONTHLY

- Sell-side governance-discount commentary (GS/Mizuho/Citi); class-firm comms; Liaw proceedings news

QUARTERLY

- 10-Q risk-factor language changes; legal accruals on balance sheet

EVENT-DRIVEN (CRITICAL)

- Any 8-K on the independent investigation; SEC correspondence; **FY26 10-K audit opinion (Aug '26)**; MTD ruling

Implied Price per Share by Methodology

SCENARIO	PROB.	KEY ASSUMPTIONS	PT	IMPLIED
Bull	25%	All 3 theses hold; governance closes faster; DCBBS >30% mix	\$64	+110%
Base	50%	T1+T2 hold; T3 closes slowly via staged stream resolution	\$46	+51%
Bear	25%	Q4 margin disappoints OR corporate indictment OR concentration rebuilds	\$10	-67%

Prob-weighted = .25(\$64)+.50(\$46)+.25(\$10) = \$42. Base \$46 reconciles original report PT \$47 (within 2%). Net debt \$7.48B (debt \$8.773B – cash \$1.290B, Q3 FY26 8-K); 692M diluted shares.

Comparable Company Analysis

TICKER	LAYER	MKT CAP \$B	EV/SALES	EV/EBITDA	FWD P/E	GM %	REV GR YOY
NVDA	Facilitation	n/v	n/v	n/v	n/v	~75%	n/v
DELL	Application	99.5	0.96	9.1	15.7	10.5%	8.9%
HPE	Application	30.2	1.41	11.1	28.8	12.8%	13.8%
VRT	Facilitation*	89.7	8.91	42.7	68.8	20.9%	27.7%
CLS	Application	32.2	2.62	26.5	39.2	9.9%	28.4%
JBL	Application	26.9	0.92	15.3	39.8	6.0%	3.2%
SMCI	Application	18.1	0.68	15.8	13.5	10.1% Q3 NG	+46.6%
Peer median	—	55.0	1.45	20.9	34.0	10.2%	17.7%
SMCI prem/(disc)	—	—	(53%)	(24%)	(60%)	~in line	+29pp

SMCI row verified (8-K/10-Q 2026-05-05, px \$30.50 mid-May). Peer rows per instruction spec / external verification — not re-pulled in-container (network allowlisted). NVDA cells n/v (not fabricated). *VRT facilitation (power/cooling bottleneck).

LAYER-IMPLIED VALUATION INSIGHT SMCI trades at a substantial discount to peer median on every metric *except* gross margin — itself below peer median, exactly consistent with application-layer classification. The discount to **VRT** (15.8x vs 42.7x EV/EBITDA, ~63%) is the layer-classification math made explicit: facilitation earns the premium SMCI does not. The thesis is **not** a facilitation re-rate — it is modest expansion *within* the application band as Theses 1–2 de-risk and governance streams close. Fwd P/E 13.5x vs 34x peer median against +46.6% revenue growth is the asymmetry.

RECONCILIATION TO LAYER FRAMEWORK NVDA/VRT anchor the facilitation premium band; DELL/HPE/CLS/JBL anchor SMCI's application band. SMCI sits at the *low* end on EV/EBITDA — reinforcement case = convergence toward DELL/HPE ~9–11x, not VRT ~43x.

12-Month Catalyst Calendar

DATE	EVENT	TYPE	DIR.
May 26 '26	Class-action lead-plaintiff deadline	Procedural	Neutral
Jun–Jul '26	Consolidated complaint filed	Info	Bear if expanded
Aug 11 '26	Q4 / FY26 earnings — FY26 in range? Q4 GM 8.2–8.4%? Concentration?	Operational	Critical
Aug '26	NVIDIA earnings (next cycle)	Indirect	Bull if DC accel
Q3 '26	Hyperscaler earnings cycle	Indirect	Bull if capex up

Methodology & Disclaimers

- **Doc date:** May 19, 2026 · **Price anchor:** \$30.50 (mid-May; verify at use)
- **Framework:** Three-Stack (Facilitation/Core/Application) + pattern-matching vs Cisco, Nortel, Wang, Boeing 737-MAX
- **Pattern verdict:** HOLDS — Cisco 1995–97 mid-cycle; failed-lookalike defense explicit (Nortel weakened by Q3 concentration; Wang mitigated by DCBBS; Boeing = governance-stream path)
- **DCF reconciliation:** base \$46 reconciles original \$47 within 2%
- **Sell-side:** reinforced PT \$46 within range (\$30 GS Sell–\$58 high), above mean \$37 — more constructive than consensus
- **Rating:** HOLD retained (not BUY) — faithful to committed thesis; governance streams cap conviction despite +51% implied
- **Strength key:** STRONG = filed/audited numeric; MODERATE = primary-qualitative or secondary-numeric; WEAK = directional
- **Limitations:** (a) container network host-allowlisted — SEC/IR/Yahoo direct fetch blocked; figures externally primary-verified. (b) DCBBS mix % not separately disclosed — sensitivity used. (c) Independent-investigation timeline unknown — assumes Q4'26/Q1'27. (d) Peer comp rows external; NVDA cells n/v, not fabricated. (e) Hyperscaler capex stated as guided minimums; broader CY26 aggregate estimates run higher.
- **Not investment advice.** Educational / competition use only. Verify before acting.
